Amped AUTOMATION

This month at Amped we're kicking goals.
We've been busy behind the scenes completing some of our largest projects to date. We look forward to sharing the end results with you soon, so stay tuned!

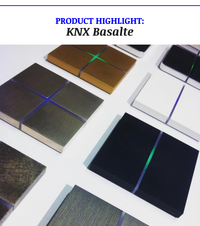
If you've been considering Smart Home solutions for your home or commercial space, get in touch with our team today to find out how we can assist you with customised and integrated Smart Home solutions.

More than just automation installers, we provide our customers with a comprehensive service that includes consultation, design, project management, delivery and maintenance.

We partner with a number of industry-leading brands including Fisher & Paykel, Schneider Electric, Panasonic and Savant, to deliver a personalised solution that's best suited to your space and lifestyle. You can find the full list of our partners here.

If you'd like to learn more about what we can offer you, give us a call on 9905 7615 to make a time to sit down together,
we'd love to meet you!

PRODUCT HIGHLIGHT:
KNX Basalte



KNX Basalte combines the latest technology with innovative design elements, allowing for seamless integration into any interior setting. KNX systems are used within new and existing commercial and domestic building automation to manage lighting, climate, audio, security and more. Handcrafted in Belgium, Basalte products offer a high-quality finish with outstanding durability.

We offer a range of expertly crafted Basalte products, including touch-sensitive switches, intelligent thermostats and motion detectors, with a minimalist design that blends perfectly into any architectural environment. Bronze, brass, brushed aluminium, glass or leather; you're sure to find the perfect finish to complement your home or commercial decor.

The team at Amped Automation can improve the comfort of your space with KNX Basalte.

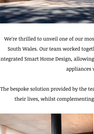
PROJECT SPOTLIGHT:
Manly Cove

We're thrilled to unveil one of our most recent project completions in Manly, New South Wales. Our team worked together with the homeowners to create a fully integrated Smart Home Design, allowing for seamless control and use of products and appliances within the home.

The bespoke solution provided by the team has delivered comfort and convenience to their lives, whilst complementing the modern architecture of the home.



Explore the Manly Project Case Study to learn more about the services we provided to complete this project.

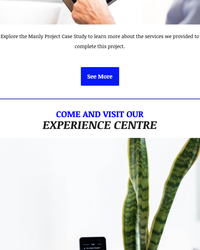
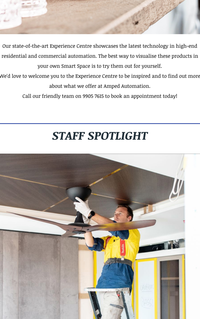
COME AND VISIT OUR
EXPERIENCE CENTRE



Our state-of-the-art Experience Centre showcases the latest technology in high-end residential and commercial automation. The best way to visualise these products in your own Smart Space is to try them out for yourself.
We'd love to welcome you to the Experience Centre to be inspired and to find out more about what we offer at Amped Automation.
Call our friendly team on 9905 7615 to book an appointment today!

STAFF SPOTLIGHT



Introducing Harry, Electrical Job Manager

We're excited to welcome Harry to Amped Automation in a permanent position after supporting the team on a casual basis over the last 4 years. Harry has a solid foundation of electrical skills, an admirable work ethic and a strong ambition to grow and develop his skills within the Amped Team. Harry has made a promising start on his first few projects and is already proving himself as a valuable member of the team.
